

Public Forum Question – Response

Subject: Traffic Problems – Carousel Close, Cromer

Question From: Mr Vincent De Luca

Meeting Date: 26 August 2003

Question: Residents have requested I convey their thanks to the General Manager for his attendance on-site concerning noise emissions of the pumps, however, residents have asked could they please be informed of when the development at 5 Carousel Close will commence and could Council please ensure that trucks do not block driveways and the street during construction?

Response:

Local Approvals has no idea when the construction of the development will commence. The approval was issued on 1 April 2003 and Council has not received any construction certificate application or submission from a private certifier indicating when the work will commence. In regards to the issues about when the construction program does commence and if there are obstructions to public places, council Rangers can investigate these issues and serve the appropriate fines.
