

**24 May 2005**

**Subject: Status Dredging of Manly Lagoon and storage of dredged materials at Reub Hudson Oval, North Curl Curl:**

**Question:**

Could Council please advise: -

- a) The status of the project?
- b) The date the dredged materials will be dropped at Reub Hudson Oval, North Curl Curl and the date the dredged materials will be removed?

**Response:**

The Director Customer and Community Services responded on behalf of the Administrator. Council is aware that this process must be carried out during the winter months but it will not be this winter. Currently potential sites are being examined as suitable sites for the spoil.

There is an understanding that the spoil will not remain on Reub Hudson Oval for longer than six months.
