Subject: Claims on Housing Mistaken

I find it amazing the blame certain people are trying to attribute to Cr Christina Kirsch for her voting to defer Warringah Council's Housing Strategy until after the next State Election.

Like me, Cr Kirsch voted to protect residents from an overdevelopment onslaught in Warringah, which sadly Labor's Housing Strategy facilitates while our area is already struggling to cope with existing development due to years of lack of funding for essential infrastructure.

It would be stupid for Council to adopt the State Labor Government's development targets now when there is a very real chance that they will no longer be in Government come the State election in March, and hopefully all planning laws and targets will be reviewed by a new incoming Coalition Government.
