Turnbull to meet carriers

It is disappointing that Minister for Communications, Malcolm Turnbull appears to dismiss the community's genuine concerns and appears to favour the interests of the Telcos in rejecting my Notice of Motion at Warringah Council to amend legislation so that Telecommunications cannot assess their own applications for mobile base stations.

This issue continues to alarm communities across the Country not just in Warringah.

Hopefully our local Federal MPs and other community based MPs across the Nation can convince Mr Turnbull he needs to act on the community's behalf and amend the legislation so that all applications for mobile base stations and towers are independently assessed and the decision based on proper community consultation undertaken by Councils not the corporates.

Councillor Vincent De Luca OAM
Warringah Councillor for "A" Ward
